

Source - Royal Automobile Club of Victoria (RACV) ‘Lifetime: Situation Critical’ - 2003. ([www.aaa.com.au](http://www.aaa.com.au))

“Crash severity on the open road is on average 3 and a half time higher than that on roads in built up areas in terms of serious crashes as a proportion of all reported crashes. Serious crashes are defined as fatal plus hospital admission”. (B Kidd, MRWA -

- Less temporally demanding
- Less effort was required
  - Less frustration resulted
- Less difficult
- Higher confidence in ability to drive safely
