However useful t

A thought for the customers out there:

"

In quality control language, we are setting the quality standard, or the quality of design.

The development process is as follows:

1. Set the quality standard, or quality of design, required by the customer
2. Plan to achieve the required quality.
   This will involve:
   a. Planning methods
   b. Planning equipment
   c. Obtaining satisfactory materials / subcontractors
   d. Selecting and training operators
   e. Planning inspection and quality control
3. Manufacture / produce first time
4. Correct quality deficiencies
5. Provide long-term quality control and planning

For Roadmarking customers, the NZ Roadmarkers Federation Tender Preparation and
Contract Review Checklists provide an effective 20(r)-227(20(d)]TJ   1y)-251(p)-20(f)-227(d)-20(e)
