Retro reflectivity requirements

How Retroreflectivity works

Distance A to B 6mm for 300 micron beads
Distance A to B 21mm for 1200 micron beads

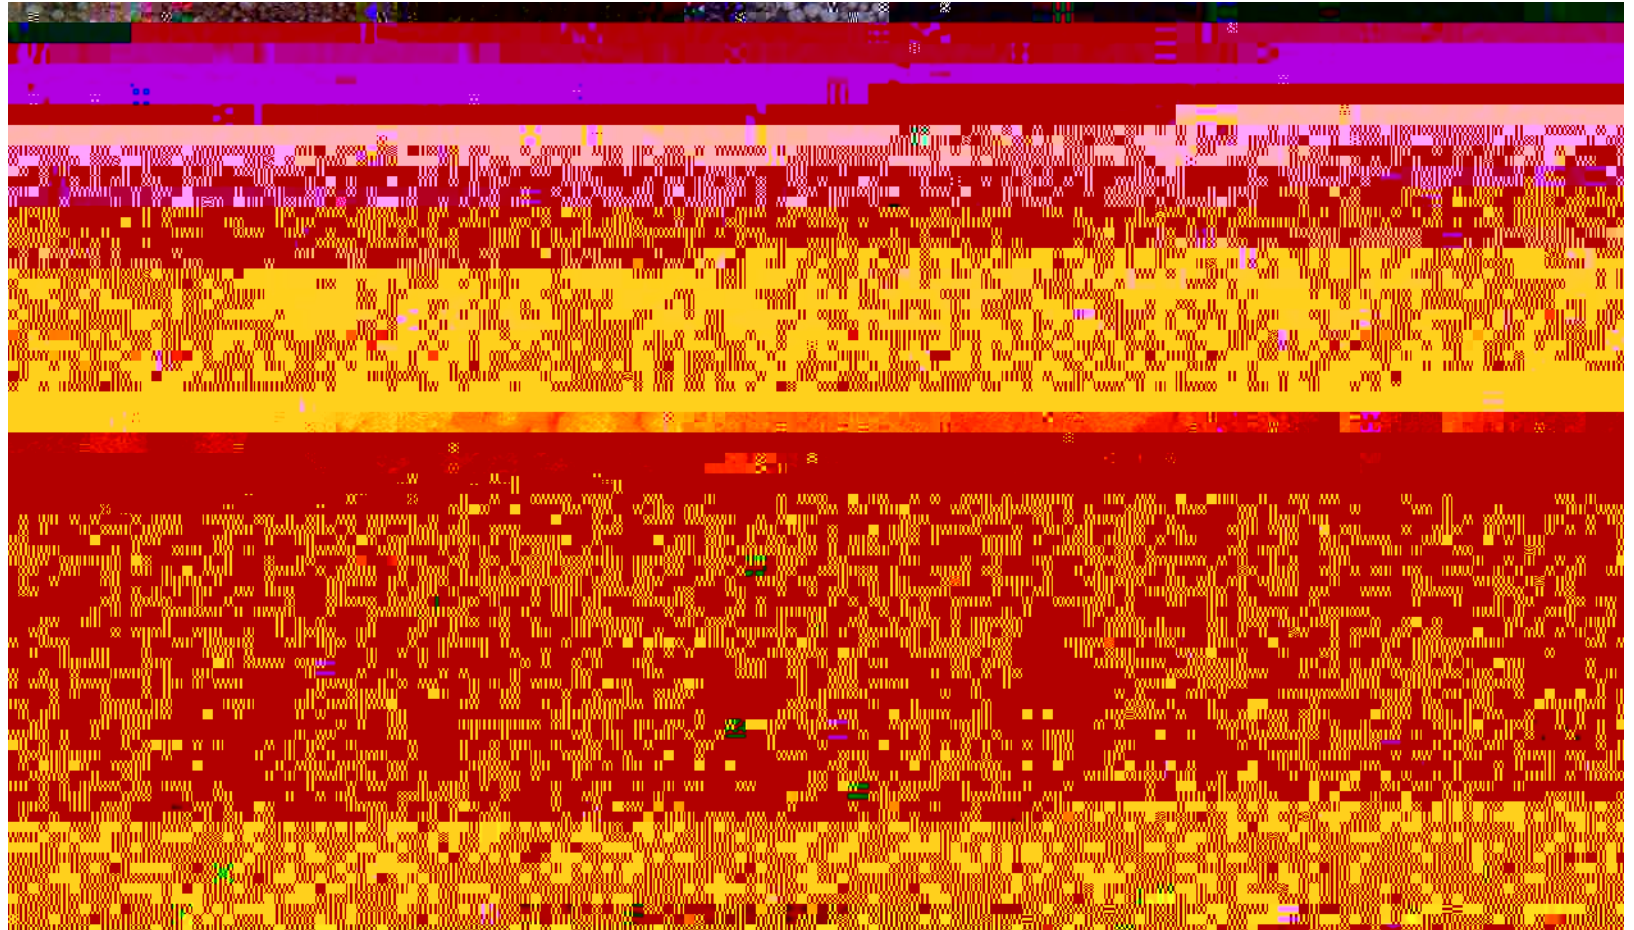

How Illumination works

How Illumination works

i Structure road marking

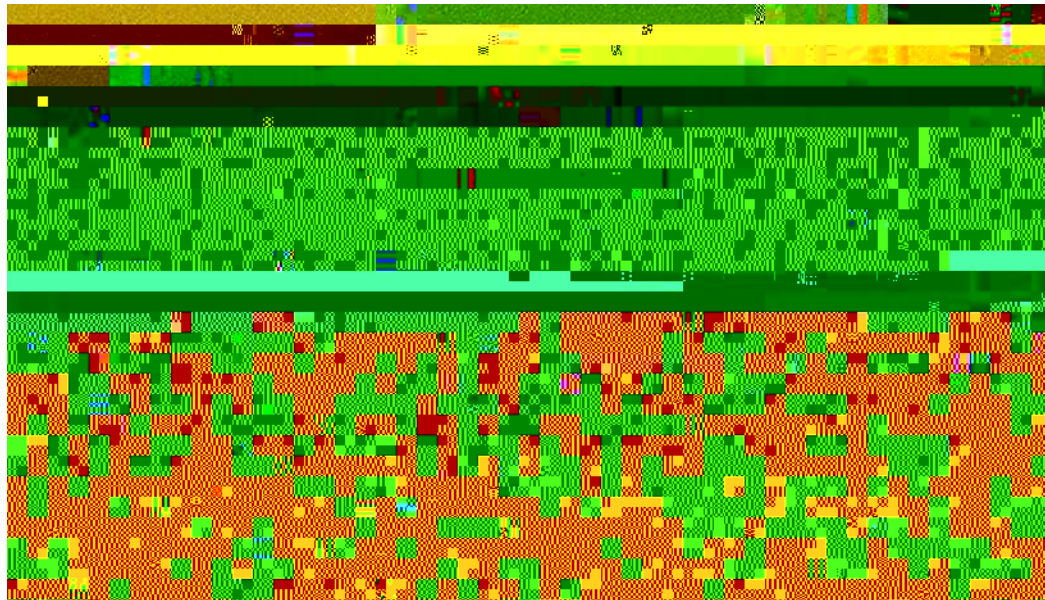

1 standard compliance

”

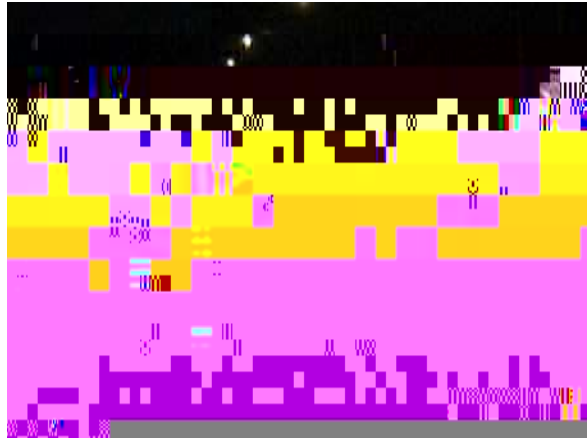

3 Colored roadmarking

- ” Some units have to be recalibrated for different colored road-markings
- ” Some units can only measure in the dark.

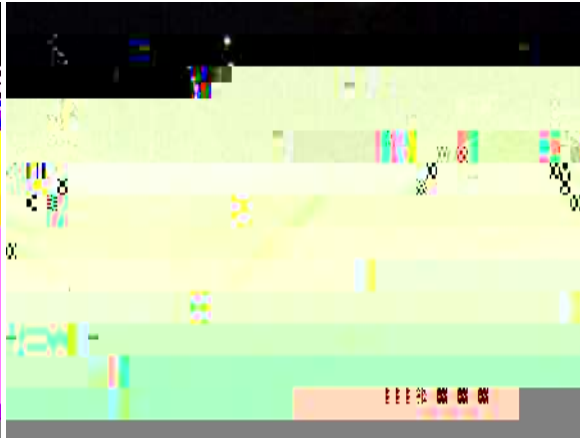

70

150

340

Thank you
