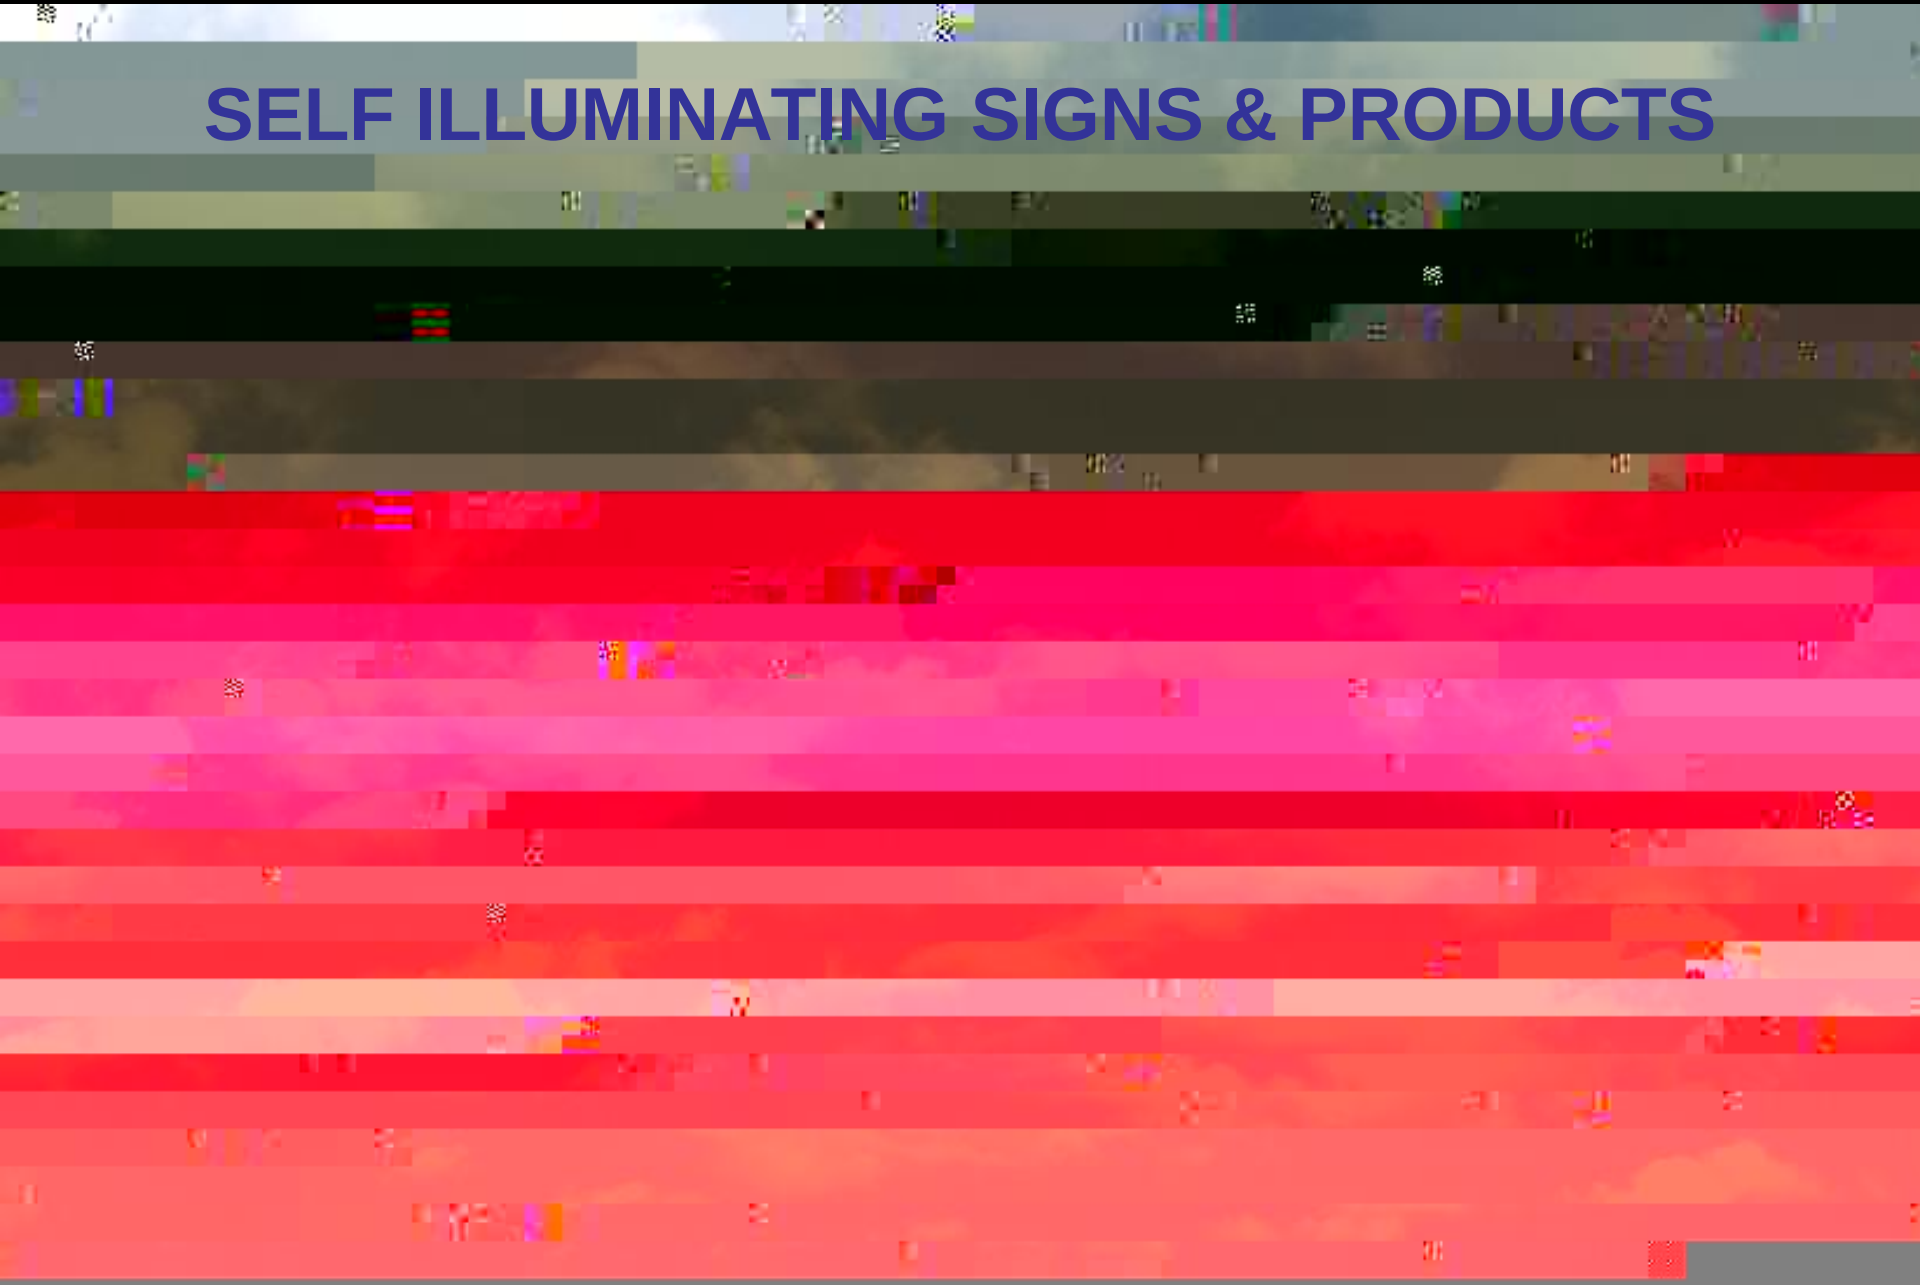
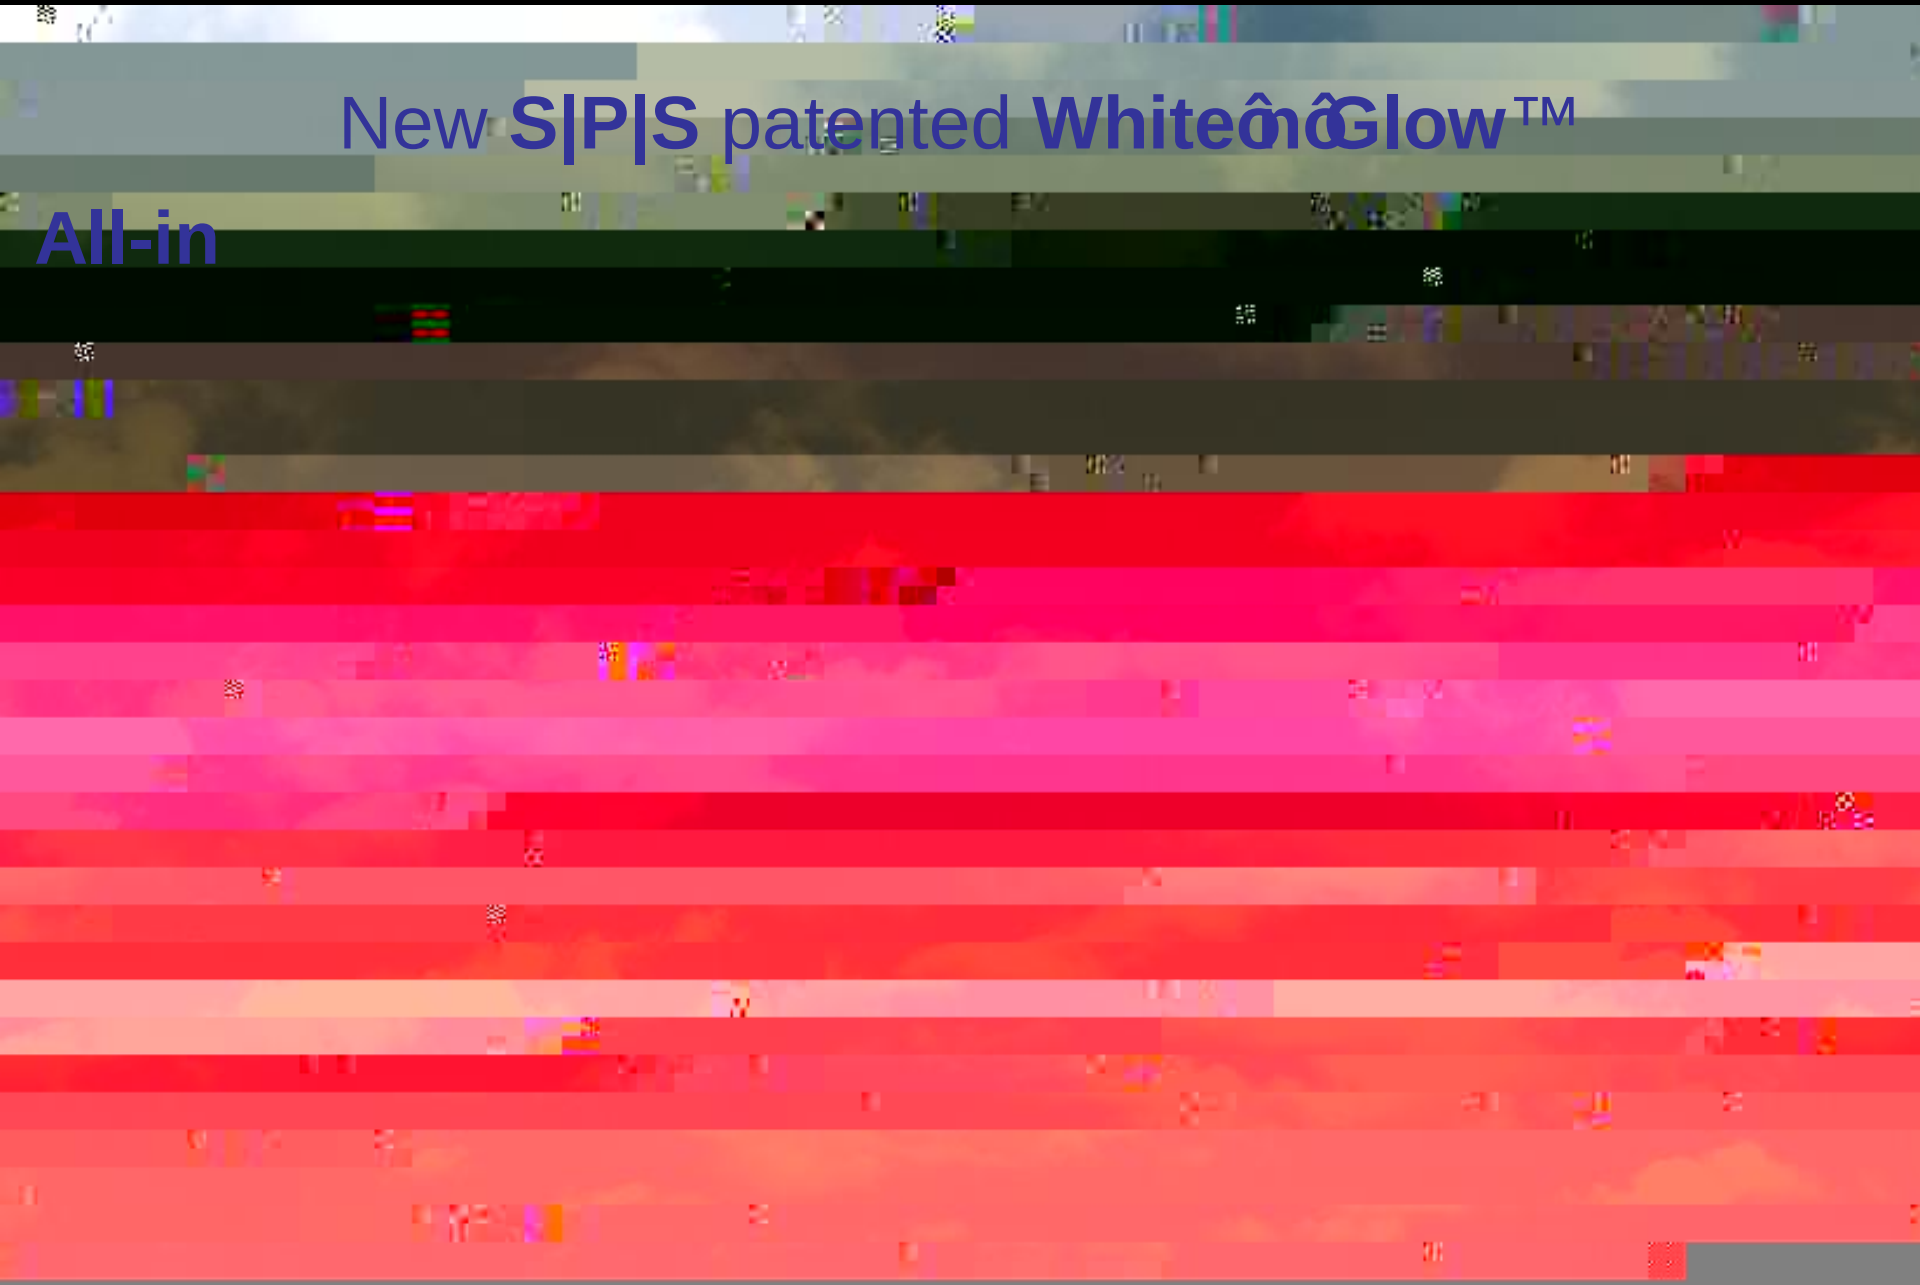
A

SELF ILLUMINATING SIGNS & PRODUCTS



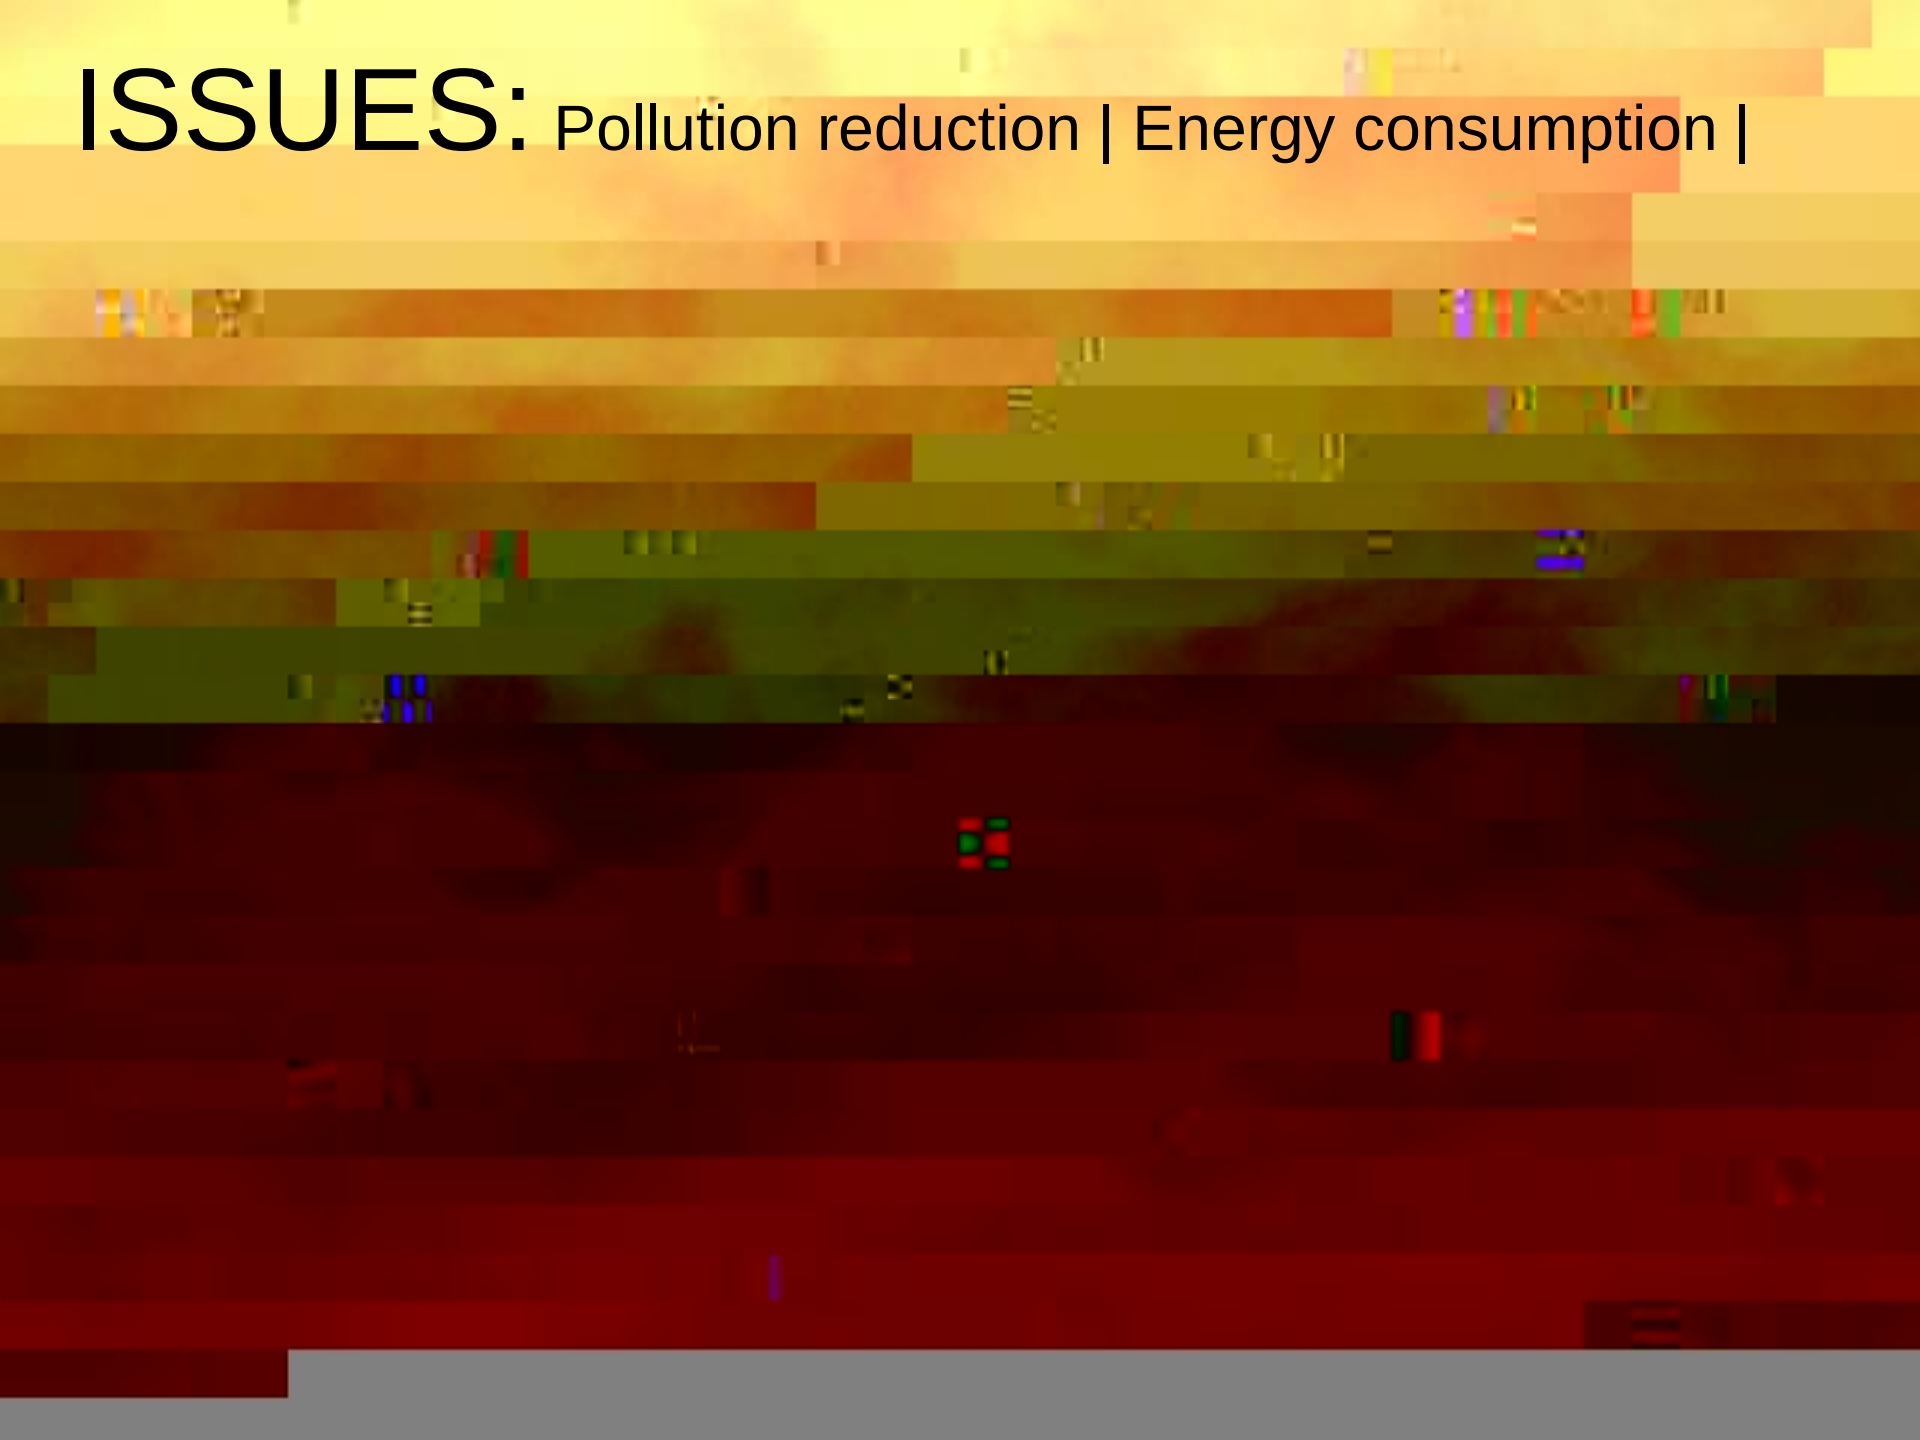
Now we present a new

Also a new **S|P|S** patented



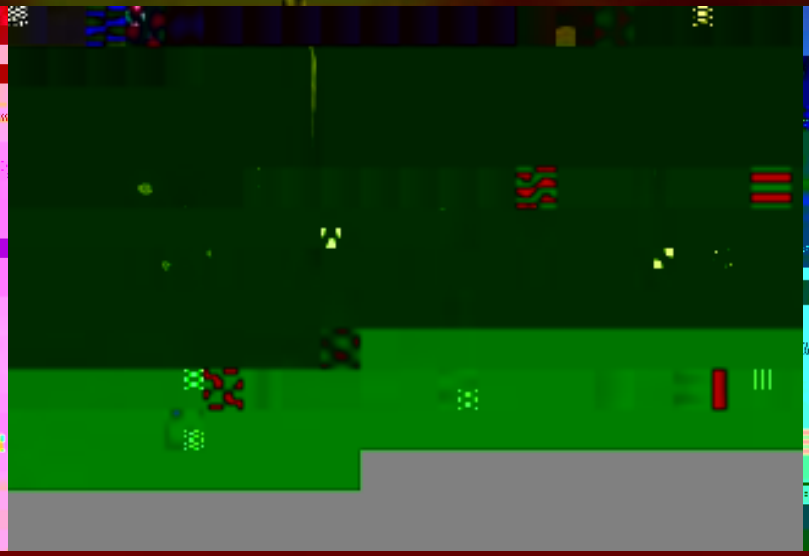
New S|P|S patented WhiteonGlow™
All-in

ISSUES: Pollution reduction | Energy consumption |



ISSUES - Assumptions:

6,000 km of bike paths across New Zealand | One electric light pole every 200 metres | Hence 30,000 electric light poles total | Each light pole is 100 Watts and runs only 10 hours per night | Cost per electric pole at $10,000



ISSUE - Pollution:

- Electricity used by electric EXIT signs in Victoria is equivalent of **126,000 tonnes of CO_2**

ISSUE – Running Costs:

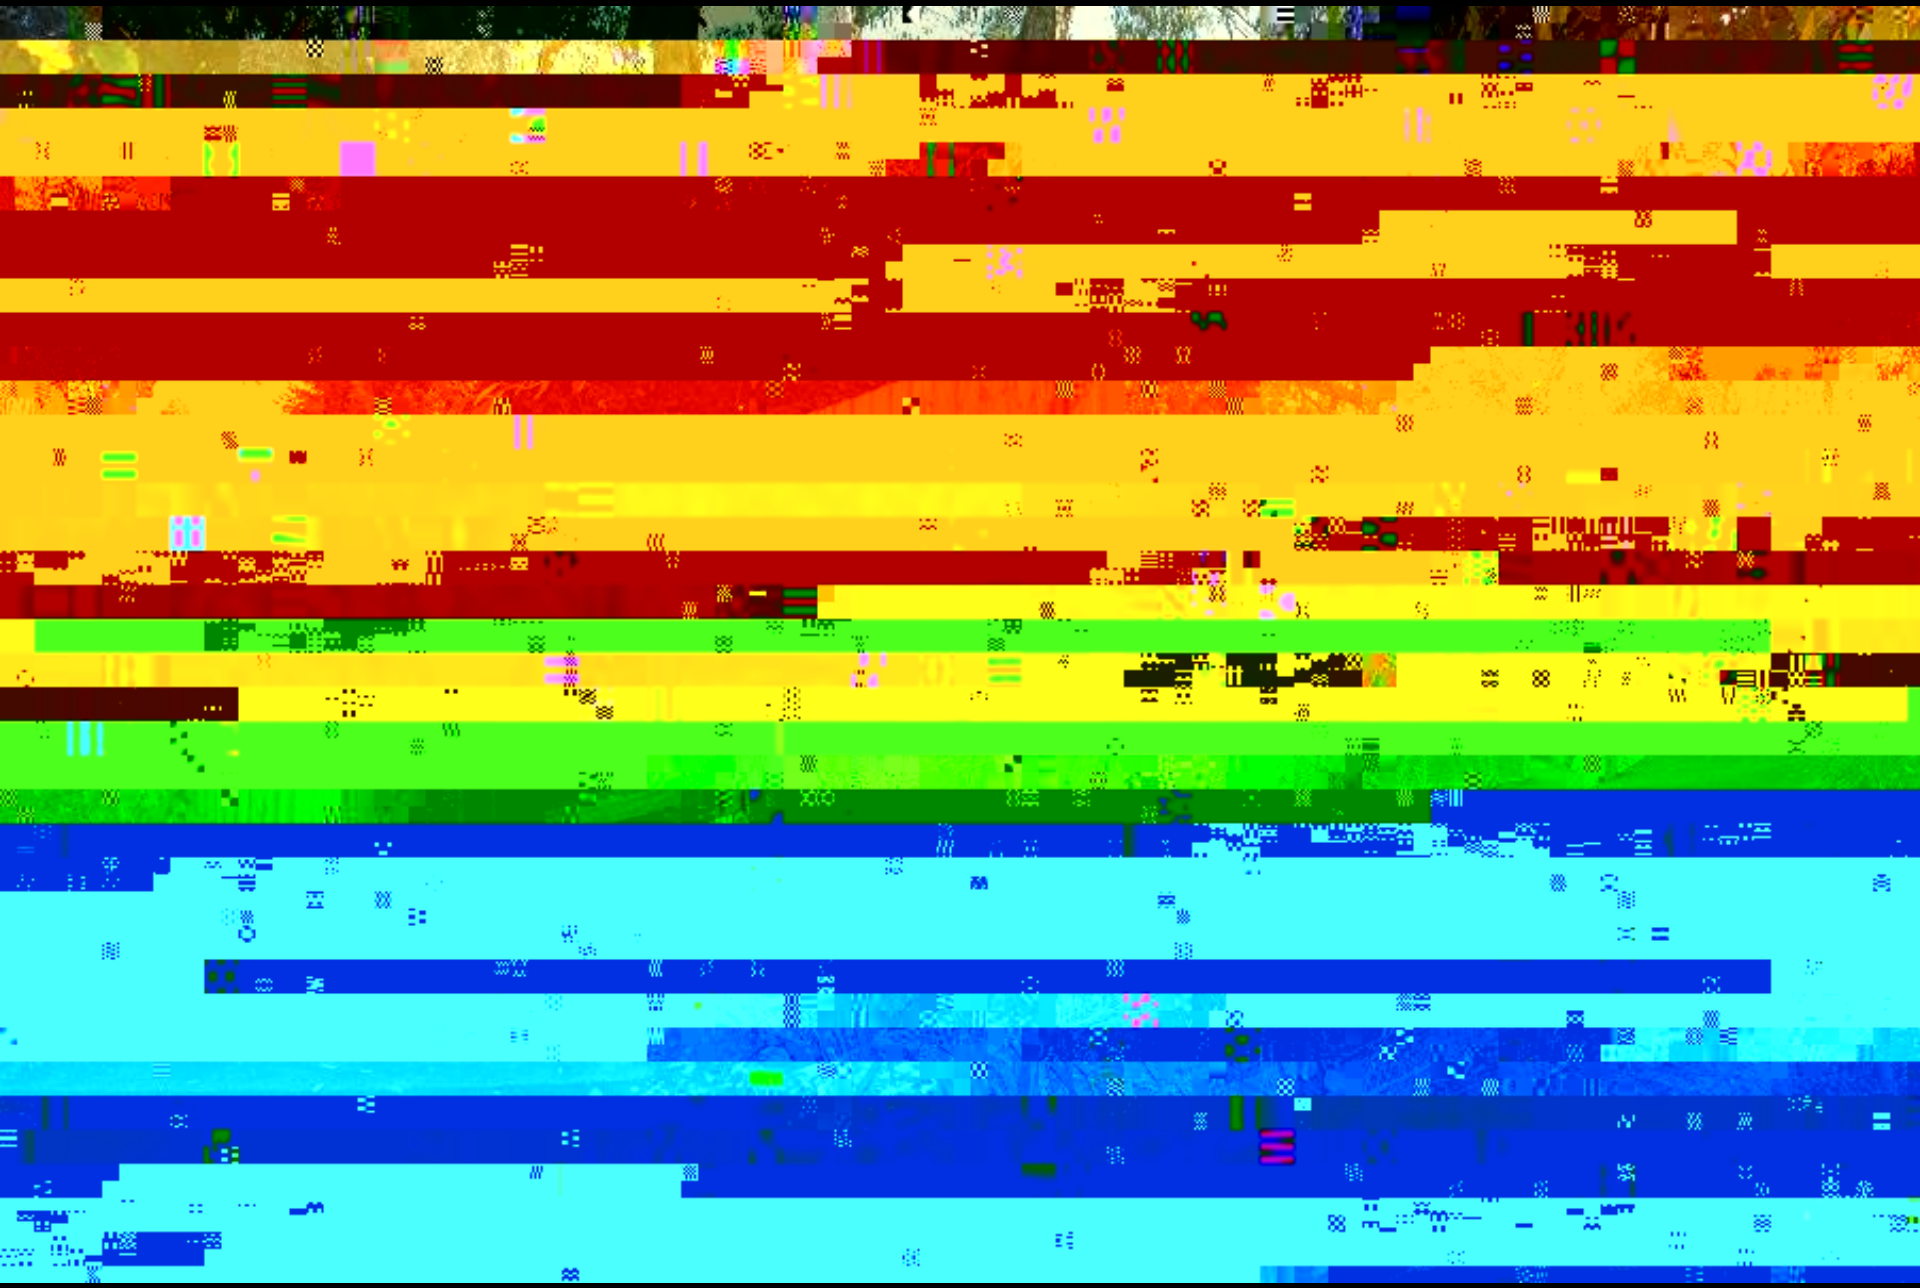
- Ongoing running cost blowouts are substantial
- Vandalism and other breakdown maintenance costs!
-

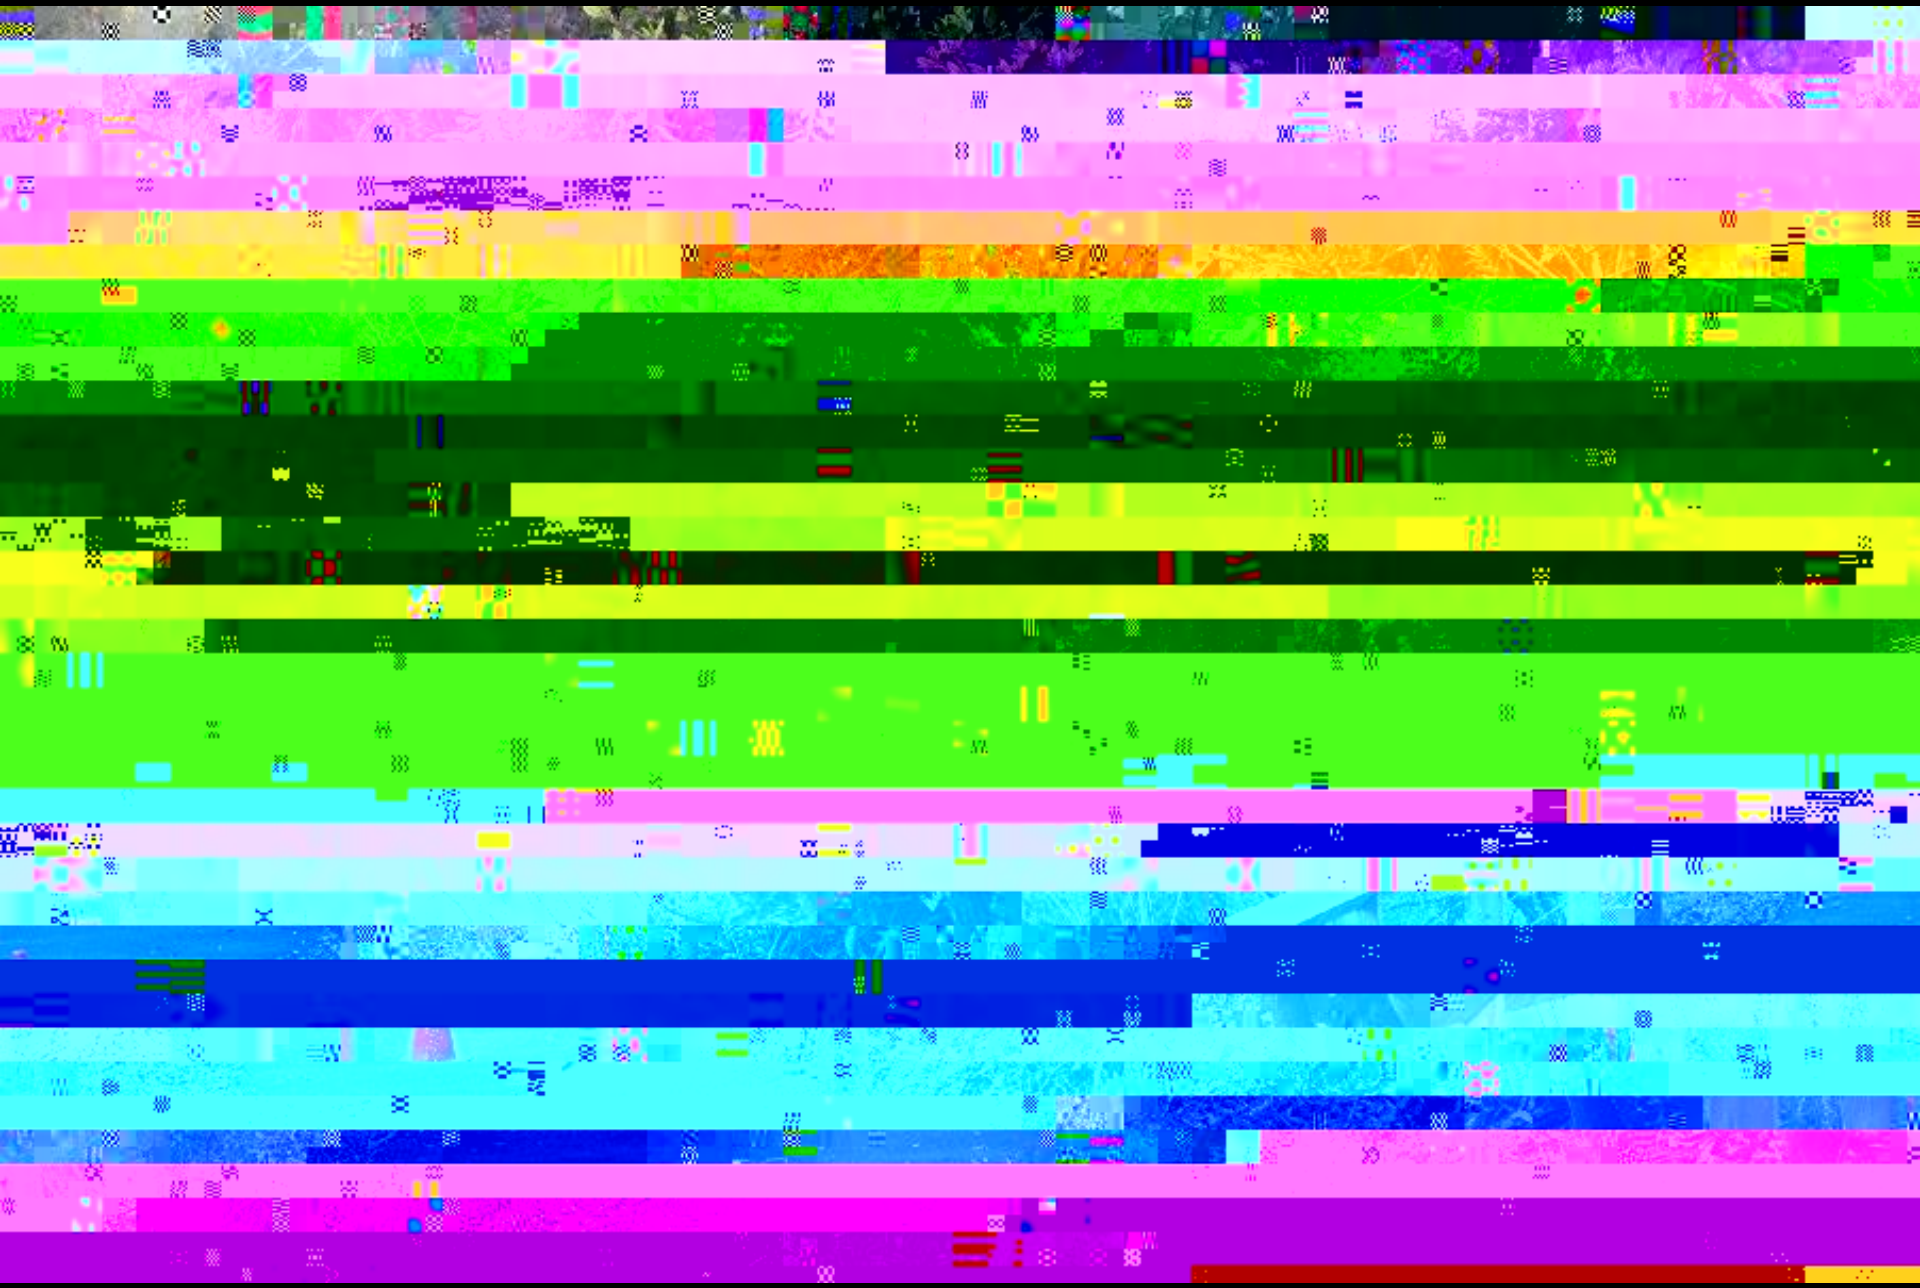
ISSUE – Carbon Tax / ETS:

- Carbon Tax / ETS adds ~$7 (was $23) per tonne of energy consumed
-

Self Illuminating Products ru40 ref0a

Self Illumination is free post installation





Feedback testimonial

Although **in our 60ôs**, my wife and I are keen hikers, walkers, cyclists and all round fitness nuts.

As we age “boomers” face not only deteriorating sight but the tendency to lose balance or fall on uneven or unlighted surfaces – I guess those tendencies could also cover a large portion of the population!

When Zoran asked me to “test”
