

There is something going on **í**

# Swedish innovations

---

# Sensus – 3 displays

The All-new Volvo XC90 can communicate with the driver in three ways:

- Head Up Display
- Driver display
- Centre d

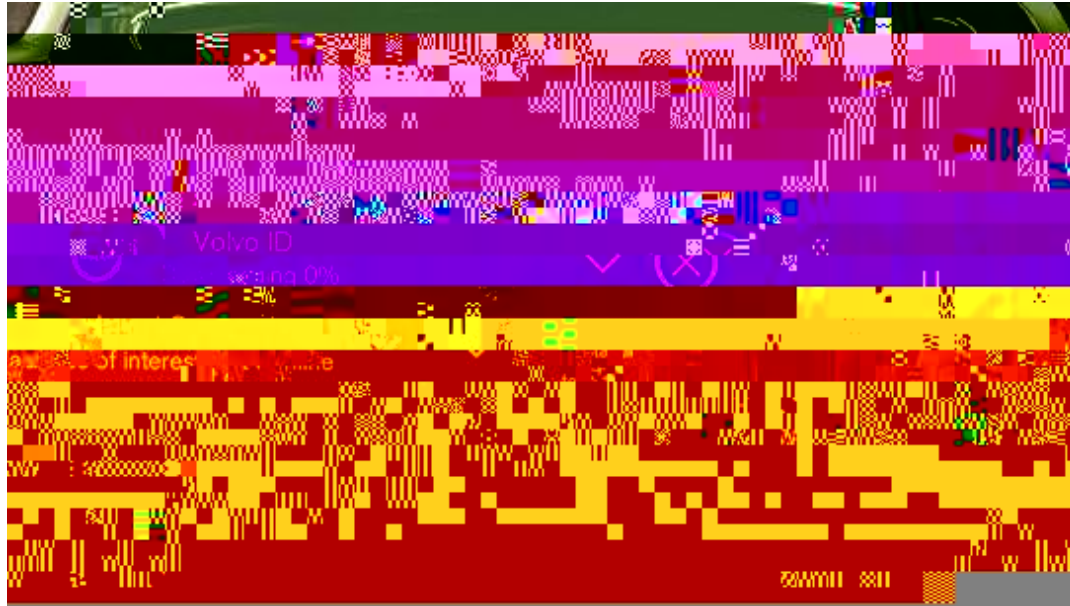

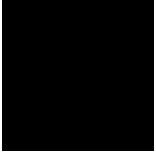

# Sensus apps

- Cars arrive without apps
- Can be downloaded and updated by dealer or customer via remote update service

- 
- Gives peace of mind when allowing others to drive your car
  - Limits top speed and audio volume
-

intellisafe

- ASDM (Active Safety Domain Master)

- 

- Detects

# Intel IISafe City safety

# Intellisafe – lane departure warning

- Camera-based system detects lane markings
- Audible and tactile warnings if lane departure imminent
- Optional lane keeping aid actively corrects steering to stay within lane markings

- Current technologies make autonomous driving possible:
  - Combined forward facing radar and camera

- Unique, reflective spray paint

Thank you
