### **Notified amendment to NZTA/NZRF T 8**

Following consultation with NZTA, the NZTA/NZRF T 8 specification is amended immediately.

This amendment clarifies industry expectation that applicators operate with two paint pumps.

This change will be incorporated into the T 8 specification when it is next revised.

#### *Clause 2, paragraph 1*

The applicator is to be equipped such that it is capable of **applying white and yellow paint as specified by the Traffic Control Devices Rule while** consistently achieving all of the requirements for both reflectorised and non-reflectorised painted pavement markings as specified by P/12 or P/22.

**Applicators shall be equipped with a minimum of two paint pumps and plumbed such that colour changes are carried out efficiently and with minimal environmental impacts.**

#### *Clause 12.3.3, paragraph two amended to state:*

At least one test type shall be run on each separate system.
