

Dura

Durability of roadmarkings

- Road trials
 - Traverse
 - Longitudinal
- In-house trials
- Measured by
 - Retroreflectivity
 - Wear
 - Colour
 - Skid resistance (BPN)
- NZTA M7 Specification

Key Findings & Future

- Product B has a higher baseline reading but also a slower rate of deterioration than Product A
- The CAST facility offers:
 - A controlled test environment (temperature, speed, loading)
 - Circular track design .
